Still having cache trouble. Uploads don't show up until I clear the cache for my website from my account with GoDaddy.

Until I solve the problem, you too might need to clear your cache. Relatively easy to do, but a pin in the neck. While holding the Ctrl-key down, click with the mouse pointer on the refresh icon - a circle with an arrowhead, in the upper left of your screen.

On an iPhone, go to settings, scroll down to Safari and click on it. Scroll down to Clear History and Website Data and click on the Clear History button at the bottom of the screen.
